SQS), Docker, CI/CD*
Tools - *Git, Nvim, VSCode,
Postman, Figma*

PROFILE
I'm a full-stack web developer with 9 years of experience across startups, international companies, and consulting. I've worked both independently and in teams, and also led developers in past roles. While I started in PHP and backend development, I now specialize in frontend technologies like React, Next.js, and TypeScript, with a strong focus on UI/UX, design systems, and product development.

EXPERIENCES
Frontend Web Developer, Enhans; Seoul, South Korea — 2024-now
Worked in very high intensity startup and produce high quality UIs in tight deadlines.
Developed and led frontend for multiple AI-powered applications using React, Next.js, TypeScript, and Tailwind CSS.

Fullstack Web Teacher, WCODING; Seoul, South Korea — 2023-2024
Taught full-stack fundamentals to beginners using HTML, CSS, JavaScript, PHP, and MySQL.Helped students build their first projects and understand real-world development workflows

Team lead developer, Redspher; Strasbourg, France — 2021-2023
Led a team of 4 developers in a big IT department
Worked closely with business units to plan and deliver new features
Continued hands-on development with React and Node.js while onboarding and mentoring internal and external devs.

Senior Web developer, Redspher; Contern, Luxembourg — 2017-2021
Built frontend features in React.js and backend services in Node.js (TypeScript, Node-RED). Improvement of application performances with the use of a CQRS architecture (SolR)

Web developer, OpCoding; Metz, France — 2015-2017
Developed and maintained a RESTful API using Laravel.
